BEST QUALITY QUARANTEED
43 YEARS EXPERIENCE

The Cyprus Potato Marketing Board was established by Law in 1964 and promotes for more than 40 years Cypriot potatoes. As from 1st of May 2004 Cyprus joined the EU and the potato market has been liberated. The CPMB however, continues to operate very successfully in the free market being the biggest exporter of Cyprus potatoes with over 1250 potato growers which sum up to more than 70% of the producers of Cyprus Island wide.

Growers are organised in "Growers Groups", the largest one being the Pancyprian Potato Growers Group (POP) that numbers almost 900 members. The Cyprus Potato Marketing Board is also co-operating with another 2 groups (Sotira group and Achna-Augorou group) and some 100 independent growers. The CPMB has undertaken the planning (quantities, varieties etc.) the packing, the shipping and the marketing of these potatoes.

Also the CPMB is planning to export a bigger quantity than last year reaching more than 70.000 tons.

... Growing with Tradition

Combining the I.F.S. protocol and Eurepgap standards we have full traceability guaranteed!

Eventhough traceability has been in use for many years ,with the full implimentation of all of our growers in Eurepgap and the further inspections and guidance of our expertise personel you can be sure to get the best potatoes.

All of our potatoes for export are produced in RED SOIL.

C.P.M.B packs and exports several varieties in order to satisfy its clients in Europe and rest of the world.

The main varieties are the following:

Normal table Potatoes : Marabel, Spunta, Diamant, Marfona.

Salad Varieties : Nicola, Filea, Anabelle, Princess, Sieglinde, Charlotte, Ditta etc.

«Flowery» varieties Sante, Cara, Freya.

«Bakers» Cara, Marfona.

«Babies» Nicola, Charlotte, etc.

«Frying» varieties Cara, Diamand, Remarka

Customer Focused..your needs are our demands!

Being customer focused, the C.P.M.B. packs the potatoes according to requirements of the trade and customers' needs.

Sizes: Potatoes for export will be packed according to the clients preferences in polypropylene bags 20Kg and 25Kg , in jumbos(1000 and 1250Kg) and in boxes of 500Kg (directly from the fields, and grated in various sizes(25-35/38mm, 35-45mm, 35-55mm, 45+mm, 65+mm, mixed sizes, etc).

All exported potatoes are properly labelled in the packing station before loading in the containers and all necessary paperwork is issued before loading.

With our long term experience of over 40 years specializing in the potato production, packing and exporting we are unbeatable when it comes to delivering the best Cyprus potatoes at your door.

All potatoes for export are inspected during growth harvesting and packing by the Board agronomists but also by the State inspectors (Cyprus Inspection Service). CPMB and Ministry of Agriculture also inspects the potatoes again in the packing station just before loading in the containers and at random in the ports during loading in the vessels and issue the necessary phytosanitary inspection certificates.

During harvesting and before loading in the packing station, the agronomists of the Board take samples at random to be sent to the State laboratory for residue analysis. Of course soil analysis and residue analysis before harvesting is obligatory for all growers participating in the Eurepcap programme.
